These are the retaliations for *not* working with the drug dealing (sine 2012) of Gossett and the federal trafficking by *nonfederal civilian personnel*

it's because they have been trying since 2019 to build a list of everyone that I have worked with (all academic or California based) - they hit each of these companies - I have family in Dallas and North Carolina - one phone call with Mike, and both companies double in size (15 million; 2 billion) in the same two weeks

essentially the story that they are trying to fabricate (some details are accurate, admittedly, but most are not) is that Newsom's policies were the destructive element and that theirs were restorative, when in fact, it was their operations at these eight California companies sabotaged, but they doubled those two where I have family
